 50X1-HUM

1. On 16 November, the Albrechts Kaserne in Vienna quartered troops who wore red-bordered black epaulets with motor transport and artillery insignia. In the barracks area there was a separate section in which several trucks, were parked. Truck towing an artillery piece 50X1-HUM was seen driving into the installation. The driver wore red-bordered black epaulets. The artillery piece was 100- to 120-mm and had a relatively short barrel, without a muzzle brake, in front of the gun shield. It was mounted on a split-trail gun carriage and had a recuperator which was about 75 cm long.
2. The Wilhelms Kaserne also quartered troops who wore red-bordered black epaulets with motor transport and artillery insignia. One of the barracks buildings, which probably housed a depot, was separated from the installation by a special fence and was illuminated from the outside. Trucks identified in the billeting area *
